

Documentation

(Dynamic Holo Sci-Fi UI Pack)

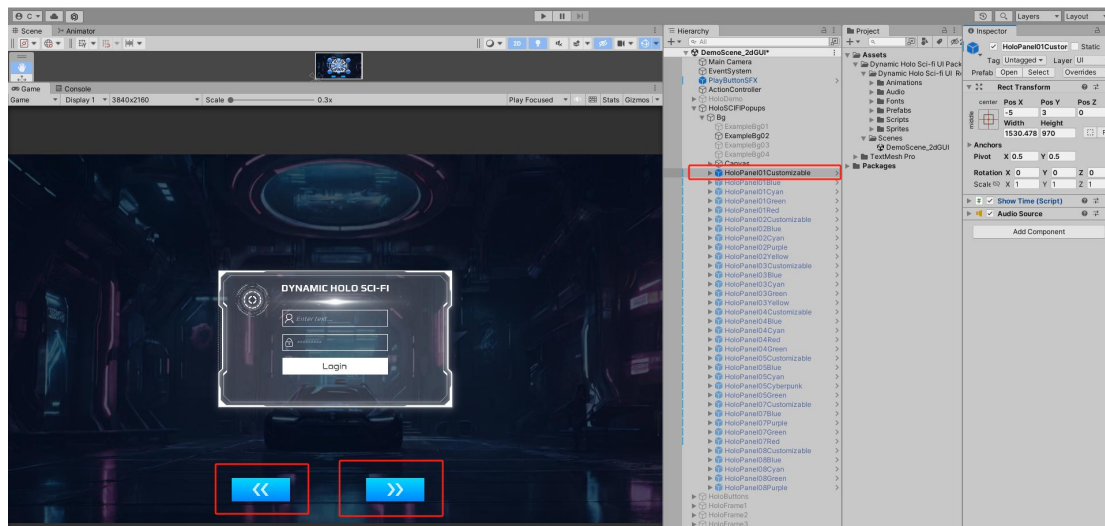

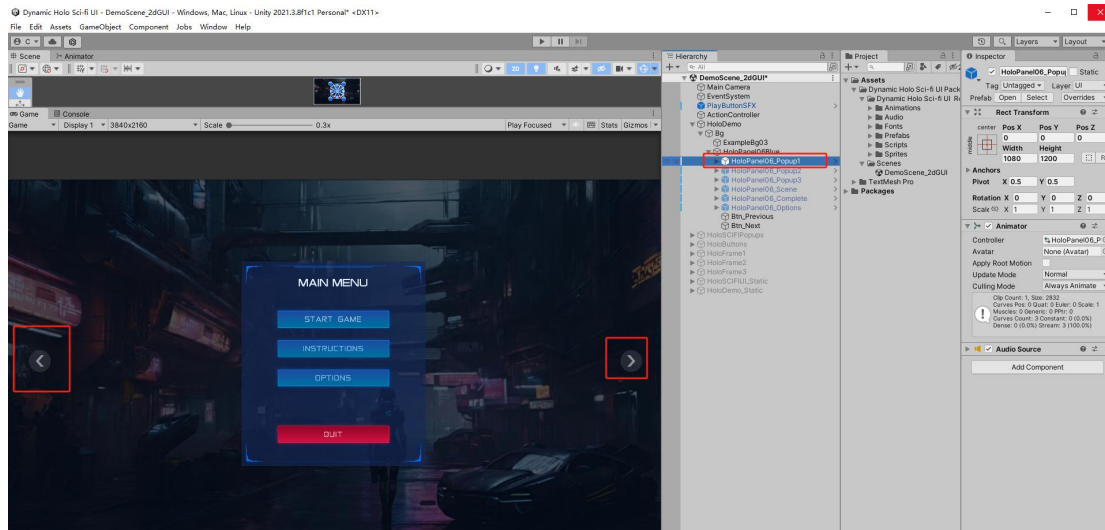

1. The default resolution of the game view is 4K: 3840px*2160px, please adjust the canvas resolution to this value when using the asset pack in Unity 3D for the first time. Of course, you can also adjust the canvas size to 16:9.

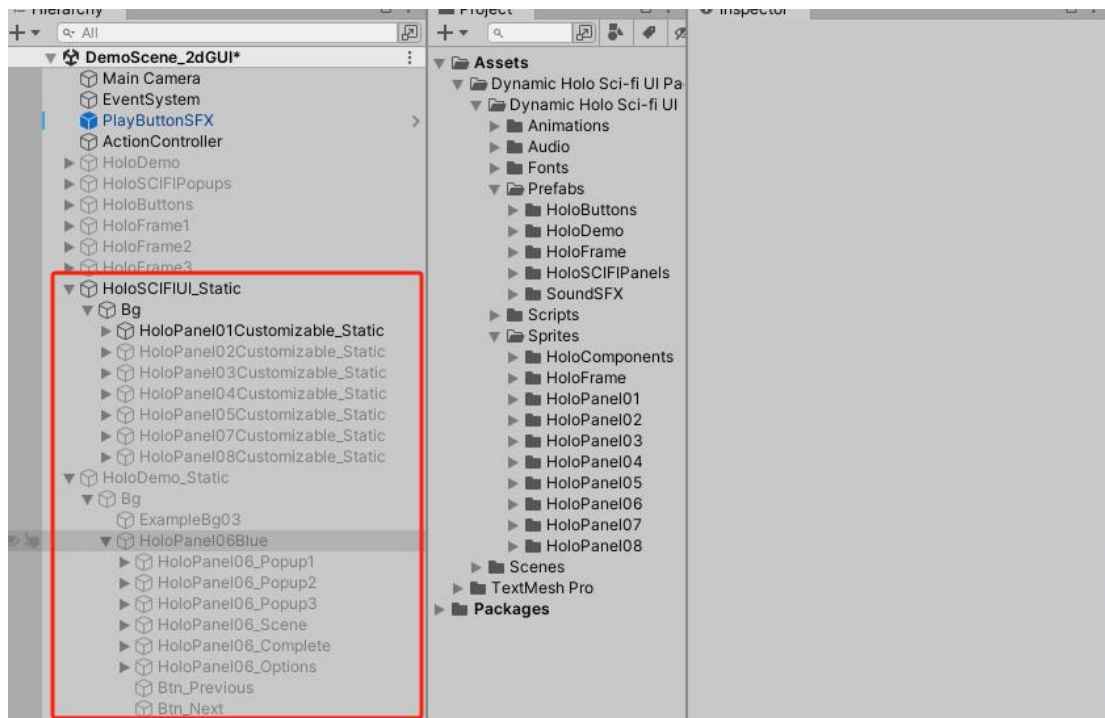

2. All UI elements in the asset package are presented as canvas.

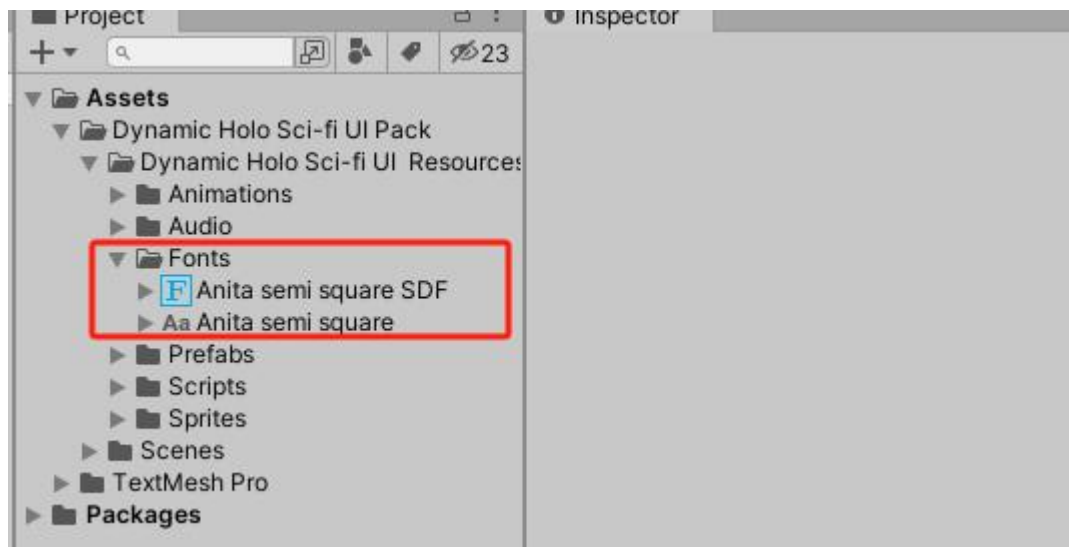

3. Use the previous and next buttons in the game scene to browse all asset content. Be sure to start browsing with the first UI component in the canvas.

4. For all the design elements, we provide two schemes: with animation and without animation, please choose to use according to your needs.

5. Licensed font: Anita semi square

Thanks for your purchase!!!
